Professional Summary

Information Technology student with experience in software development, project coordination, technical support, and customer service. Experienced in working across mobile and web application projects, with an interest in project management, Agile methodologies, software quality assurance, and technology-driven solutions. Combines technical knowledge with strong communication, problem-solving, and collaboration skills developed through academic projects and professional experience.

Professional Experience

Project Manager / Mobile Developer | HealthCast Capstone Project | National University | 2025–2026

- Led the planning and coordination of a mobile and web-based predictive health platform focused on mosquito-borne disease trends and climate-related variables.
- Coordinated development activities across mobile, web, backend, database, testing, and documentation requirements.
- Contributed to the development and integration of Flutter, React, Node.js/Express, and MongoDB components.
- Participated in functional, integration, usability, compatibility, and performance testing to evaluate system quality.
- Coordinated system evaluation and feedback activities with stakeholders from the Department of Health and other stakeholders.

Tier 1 Technical Support / Customer Service Experience | Alorica | 2022-2023

- Served as Tier 1 technical support, diagnosing and resolving mobile software, hardware, and wireless connectivity issues for US-based customers.
- Handled high-volume inbound calls for a US-based telecommunications client, resolving billing disputes, device faults, and product queries with professionalism.
- Consistently met all key performance metrics.

Student Council President | Fort Bonifacio High School | 2020-2021

- Established a **Peer Tutoring Program** to provide academic support to students experiencing difficulties with remote learning during the pandemic, enabling high-performing students to tutor and assist their peers.
- Provided **mobile load assistance** to students to support their participation in online classes and ensure continued access to learning resources.
- Organized and facilitated **donation drives** to provide assistance to students affected by calamities.

Education

BS Information Technology | National University | 2022-2026

BS Information Technology | De La Salle University-Manila | 2021-2022

Information and Communication Technology (SHS) | Fort Bonifacio High School | 2018-2020
